Hi, if you face any issues or want some modifications on the model or want some other prefabs contact me on email or Instagram: instagram.com/Titan.Craft1

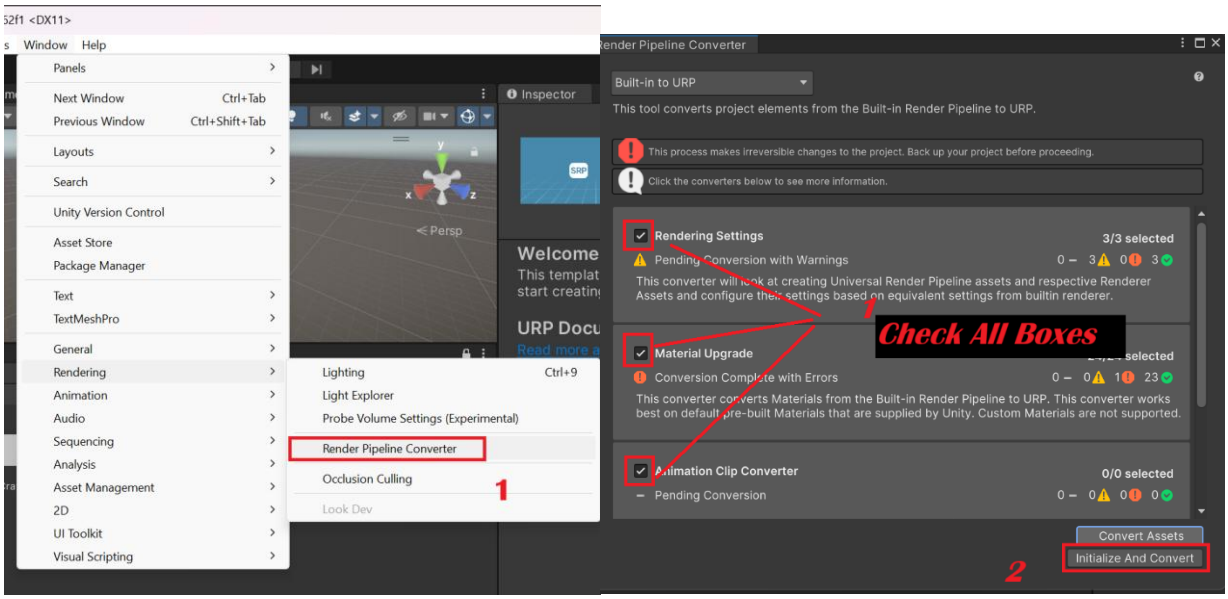

Titan.Craft1DC@hotmail.com

I will gladly fix or edit it for you.

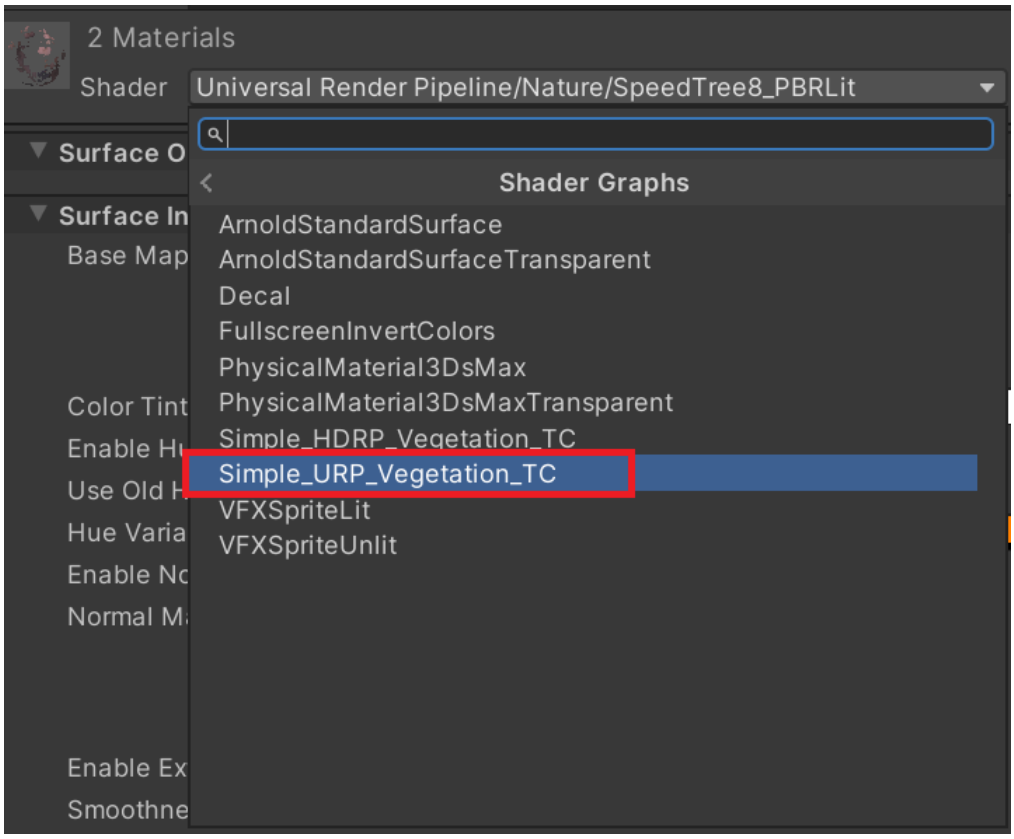

A: Unity 2022 RPs

1: URP

Convert materials to URP :

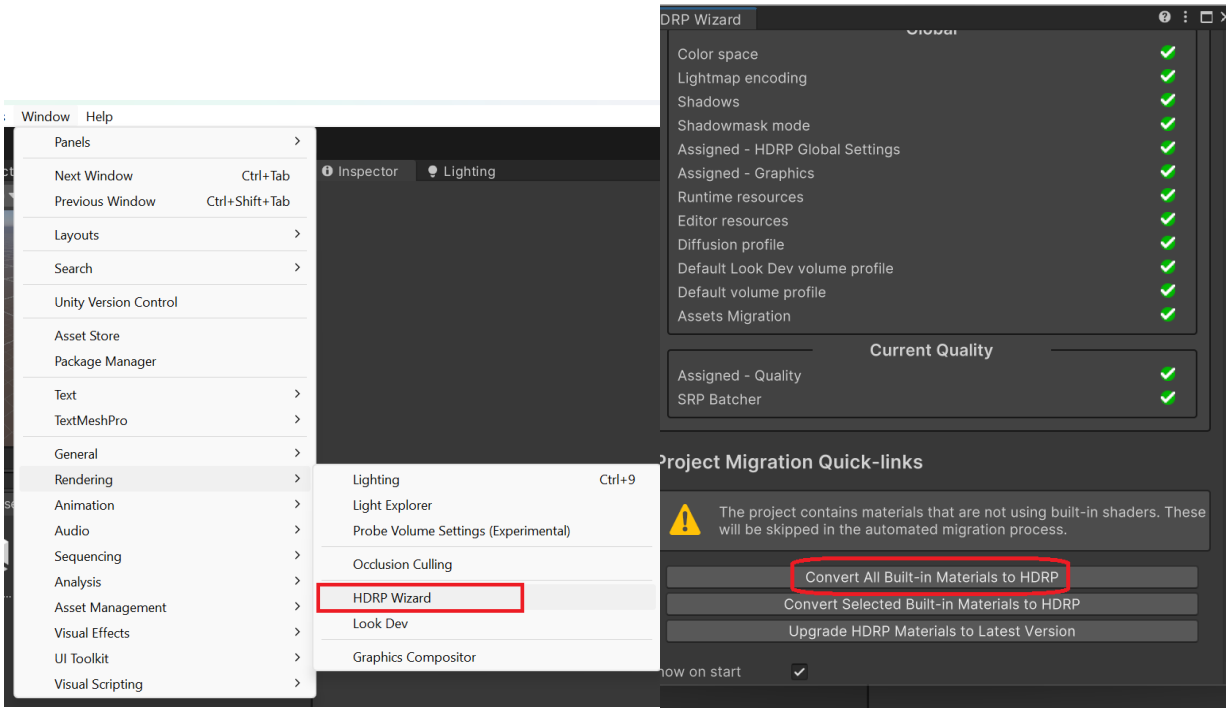

Change materials shaders to my costume shader:

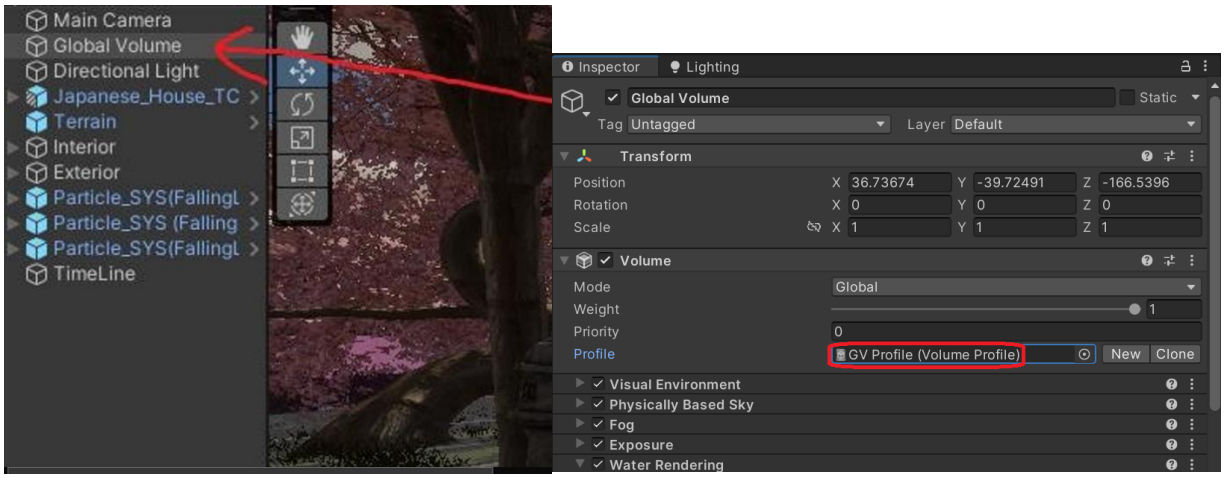

2: HDRP

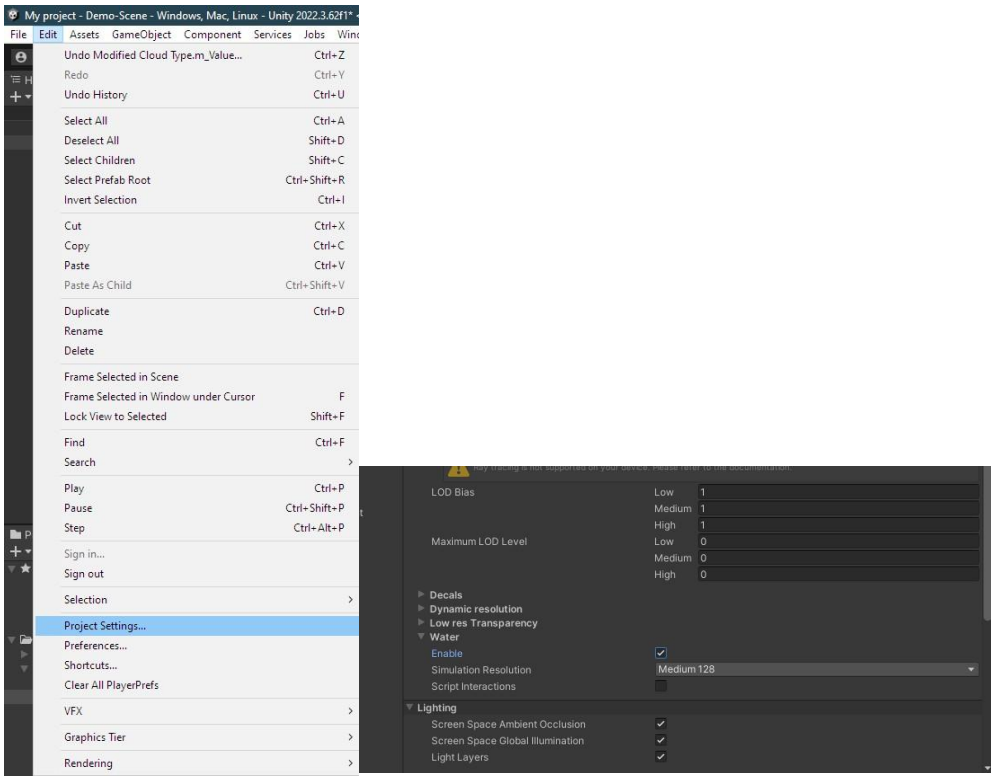

Convert all materials to HDRP :

Change global volume profile

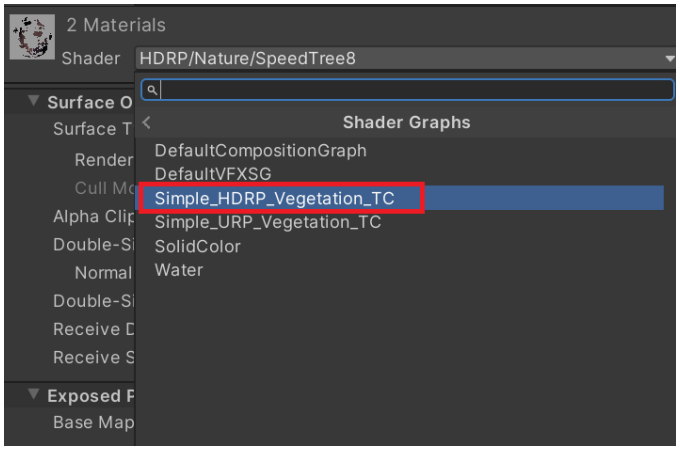

Enable water

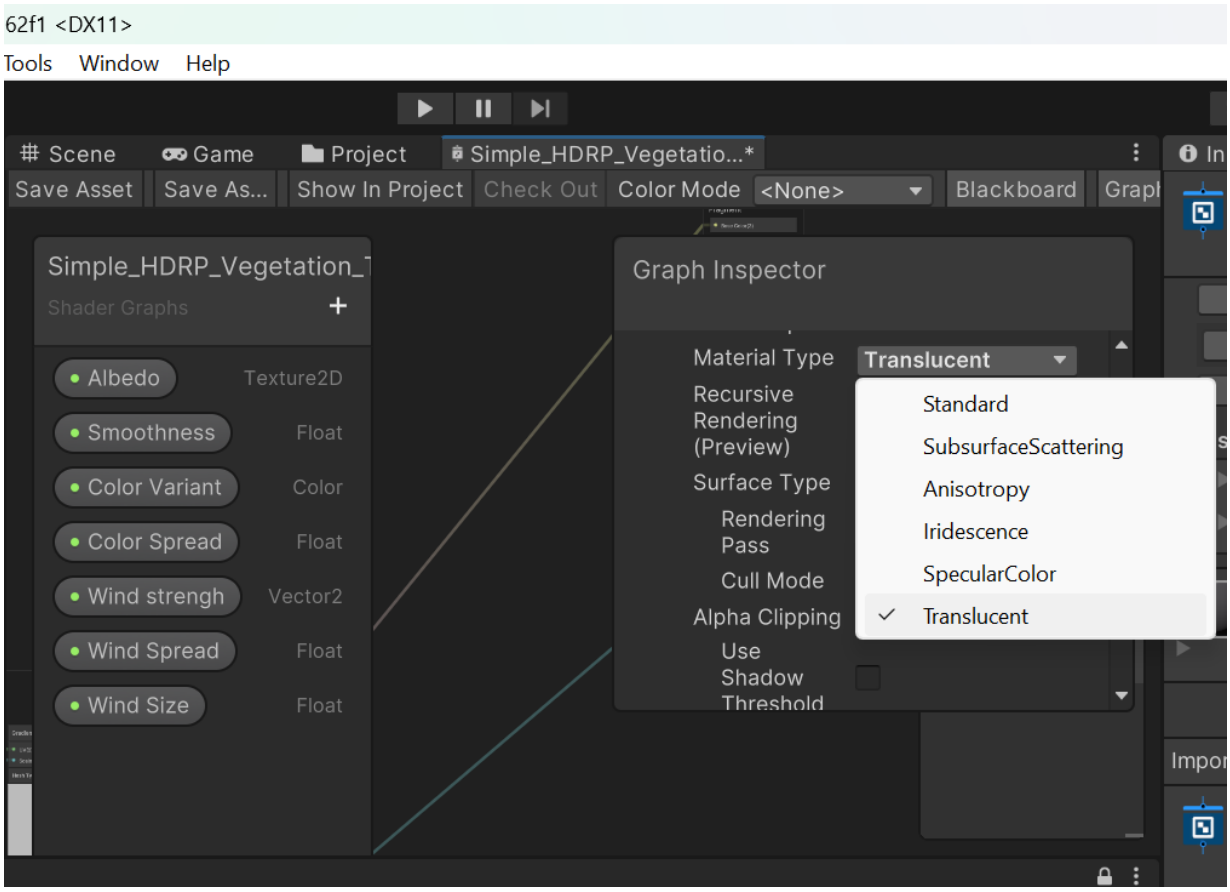

Change materials to custom shader

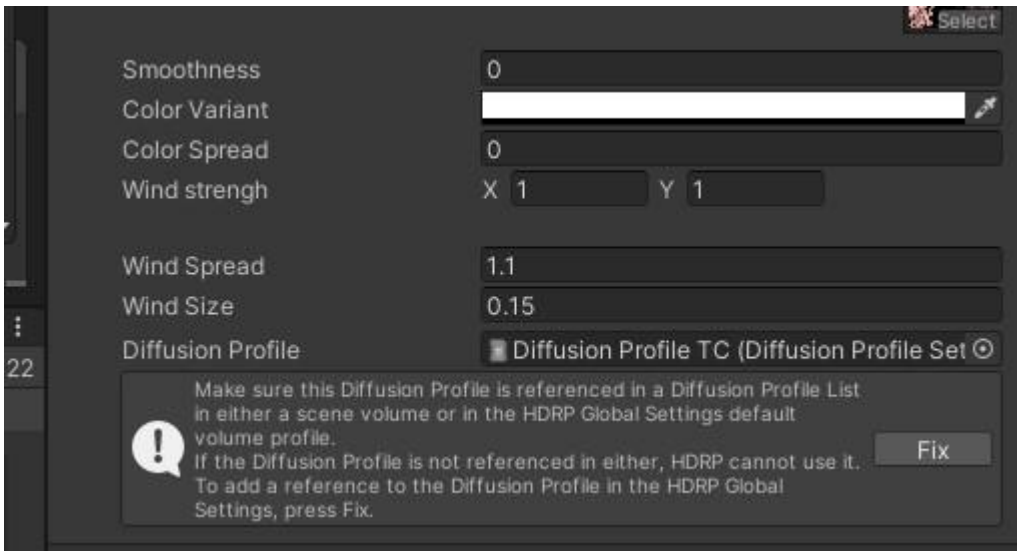

Translucent: Make sure the material type is set to translucent in the costume shader

Make sure save it after changing it, by clicking: Ctrl+S

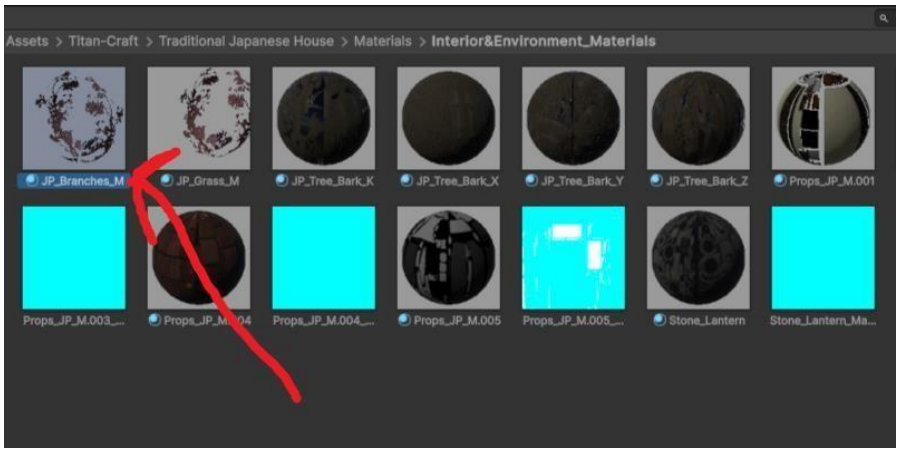

Fix the diffusion Profile If YOU FACE THIS ISSUE : Go to materials and find JP_Grass_M You should see something like this in the pic, if yes click fix

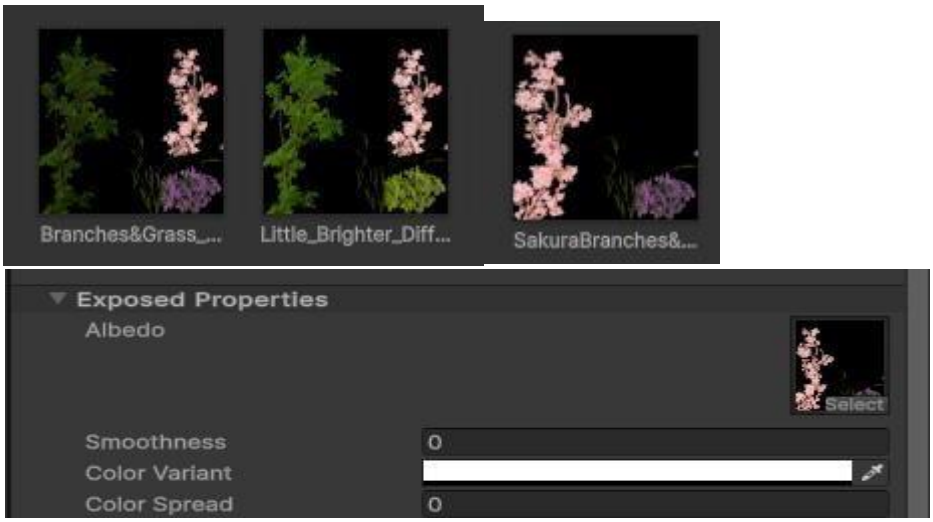

How To Change Tree to or from Sakura to green leaves:

-So, if you want to change the tree between Sakura and green leaves you can:

Find the Material *JP_Branches_M* located in \Titan-Craft\Traditional Japanese House\Materials\Interior&Environment_Materials

then change the Albedo to one of those PNGs *Branches&Grass_Diffuse* *Little_Brighter_Diffuse* *SakuraBranches&Grass_Diffuse* That are Located in \Titan- Craft\Traditional Japanese House\textures\\Interior&Environment_Textures

I have generated couple of pics using AI because of the lack of free ones that I needed
